Introduction
This report is based on the findings of the Queensland Government Next Step survey, which targeted all students who completed Year 12 and gained a Senior Statement in 2009, whether they attended a Government, Catholic or independent school, or a TAFE secondary college. The Office of the Government Statistician conducted the survey between 30 March and 12 May 2010, approximately six months after the young people left school. Responses were predominantly collected via computer-assisted telephone interviewing with a paper-based survey collected from a small number of students for whom telephone details were not available.

The statewide and regional reports of the Next Step survey can be located at the Next Step website at www.education.qld.gov.au/nextstep

Response rate for Our Lady's College
Table 1 below reports the response rate for Our Lady's College. It expresses the number of respondents from this school, as a percentage of all Year 12 completers attending Our Lady's College in 2009.

It has not been possible to ascertain how representative these responses are of all students at this school.

Definitions of main destinations
The pathways of Year 12 completers were categorised into ten main destinations. Respondents who were both studying and working were reported as studying for their main destination. A table defining these categories can be found in the statewide report at www.education.qld.gov.au/nextstep

Summary of findings
In 2010, 79.4 per cent of young people who completed their Year 12 at Our Lady's College in 2009 continued in some recognised form of education and training in the year after they left school.

The most common study destination was university (58.8 per cent). The combined VET study destinations accounted for 20.6 per cent of respondents, including 17.6 per cent in campus-based VET programs, with 13.2 per cent of Year 12 completers entering programs at Certificate IV level or higher.

2.9 per cent commenced employment-based training, either as an apprentice (1.5 per cent) or trainee (1.5 per cent).

In addition to the above study destinations, a further 2.9 per cent of respondents from this school deferred a tertiary offer in 2010 (deferrers are shown in Figure 1 in their current destination).

20.6 per cent did not enter post-school education or training, and were either employed (13.2 per cent), seeking work (5.9 per cent) or neither studying nor in the labour force (1.5 per cent).
